### Important Footnotes:

- <sup>1</sup> For a 6-11 month old infant not being issued baby foods, with MDF, the formula amounts for these formulas are the same as the amounts in the 4 - 5 mos table.
- <sup>2</sup> Elecare infant or Jr- use the 64 recon amounts for children, rec is 30 kcal/oz for children only.
- <sup>3</sup> For women, the MMA is 910 fl. oz, see formula handbook for products and the recon amount.
- <sup>4</sup> Some products have food packages in WISPr such as Enfacare, Nutramigen/Nutramigen with Enflora LGG, Pregestimil, Alimentum, Neosure-if a package is not available, use a Direct Bill.
- <sup>5</sup> If RTF is only available in 2 fl oz, it may be issued. Rarely would 2 fl oz. be used, some supply companies will only order them for hospitals.
- <sup>6</sup> Nutramigen and Nutramigen Enflora LGG are two separate products; Nutramigen Enflora LGG is only in powder form.
- <sup>7</sup> Neocate Jr and Jr w/ prebiotics are two different products. flavors have variable recon amount
- <sup>8</sup> Medical supply companies (i.e Norco, Coram etc.) can often break cases whereas the stores/vendors cannot.
