

Figure 6. Influenza-Related Deaths Occurring in Idaho¹
 Number of Deaths by Age Group, Gender, and District of Residence
 Deaths Occurring During the 2009-2010 Flu Season²

Residence	Total	Age			Gender	
		<18	18-49	50+	Female	Male
District 1	3	-	1	2	2	1
District 2	-	-	-	-	-	-
District 3	4	-	2	2	1	3
District 4	5	1	4	-	2	3
District 5	2	1	1	-	-	2
District 6	5	1	1	3	4	1
District 7	2	1	-	1	-	2
Non-resident	1	-	1	-	-	1
	-					
Total	22	4	10	8	9	13

Notes:

- Influenza-related deaths are based on ICD coding for Influenza in Part I and Part II on the Death Certificate. Influenza may have been the underlying cause of death or contributed to death.
- 2010 Flu season: September 1, 2009 - May 1, 2010. Typical flu season is October 1, 2009 - May 1, 2010.

According to the Idaho death certificates, 16 of the 22 deaths in Idaho were explicitly designated as H1N1 Influenza infections.
