### Vaccine Assessment Fund

- Beginning July 1, 2011 the vaccine assessment will fund HPV vaccine for females
  - VFC eligible and non-VFC eligible
  - Only Idaho residents
  - Through 18 years of age
  - Begin to deplete private stock

---

---

---

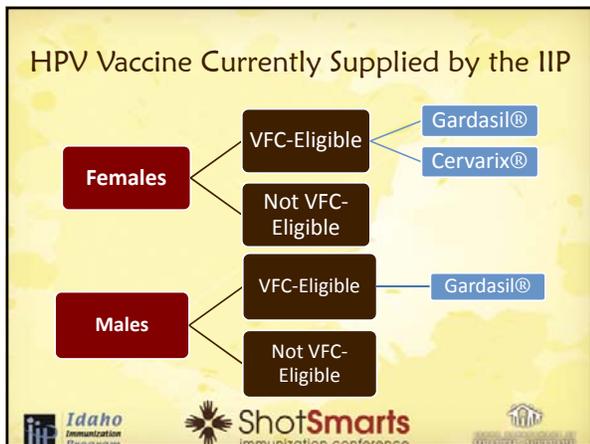

---

---

---

---

---

---

---

---

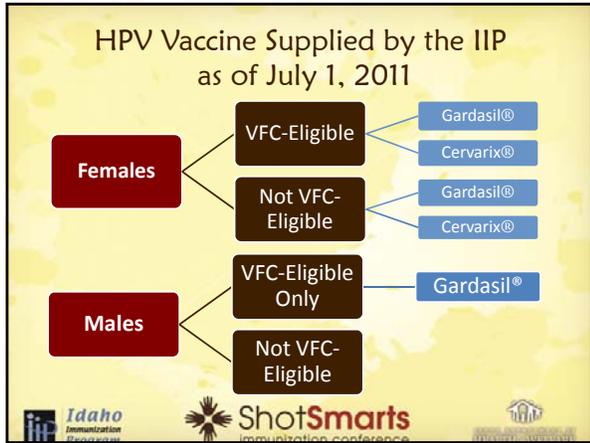

---

### Vaccine Assessment Fund...continued

- 2011-2012 seasonal influenza vaccine will be partially funded
  - Health Insurance carriers will reimburse
  - Assessment board will be gathering additional information for the 2012-2013 season
- Idaho residents are eligible
  - The IIP will continue to cover border children with state-supplied vaccine

---

---

---

---

---

---

---

---

---

---

---

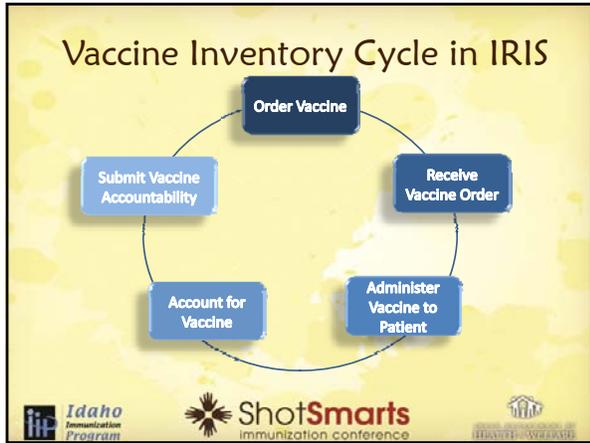

---

---

---

---

---

- ### Vaccine Ordering
- Know and follow your ordering frequency
  - On-hand inventory is required when placing a vaccine order
  - Have a trained back-up person for vaccine ordering
- Logos at the bottom: Idaho Immunization Program, ShotSmarts immunization conference, and Idaho Department of Health & Welfare.

---

---

---

---

---

---

---

---

- ### Vaccine Accountability
- Each dose of state-supplied vaccine administered will be entered into IRIS within 60 days
    - Lot numbers must be tied to doses
    - Historical doses administered information can still be sent to the IIP to be entered (information prior to July 1, 2010)
    - Must be submitted through IRIS
- Logos at the bottom: Idaho Immunization Program, ShotSmarts immunization conference, and Idaho Department of Health & Welfare.

---

---

---

---

---

---

---

---

---

### Loss/Waste

- How much vaccine was wasted in 2010 due to out-of-range temperatures?
  - **\$ 157,706** in resolved incidents
- What is acceptable?
  - **less than 5% waste**
- What can be done to prevent vaccine loss?

---

---

---

---

---

---

---

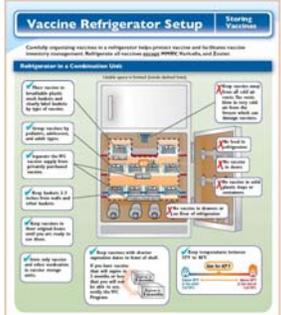

---

---

---

**EZIZ.org**

- On-line storage and handling training resource
  - California immunization resource
  - Some information is California specific

**Idaho Immunization Program** **ShotSmarts** immunization conference

---

---

---

---

---

---

---

---

---

---

### Storage

- Refrigerated vaccines **must** be kept at 35°-46° F
- Frozen vaccine **must** be kept below 5° F
- Store vaccine in the middle of the refrigerator
- Place containers of water in the refrigerator door and drawers to stabilize temperatures
- Check temperatures twice a day!

---

---

---

---

---

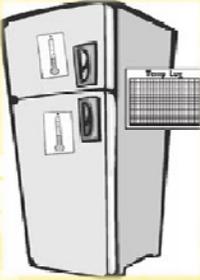

---

---

---

### Storage...continued

- Do not store food or drink in the same fridge as your vaccine
- Do not over fill your refrigerator
- Know your office protocol for power or equipment failures

---

---

---

---

---

---

---

---

### Handling

- Rotate your vaccine stock so shorter dated vaccine is in the front
- Notify the IIP 90 days before vaccine expiration date
  - Almost 5,000 doses reported expired in 2010 (loss of approximately \$79,161)
  - Report by email to [IIP@dhw.idaho.gov](mailto:IIP@dhw.idaho.gov) or by fax to (208) 334-4914

---

---

---

---

---

---

---

---

Handling...continued

- Keep vaccine in the original packaging
- Draw up vaccine at the time of administration

Epidemiology and Prevention of Vaccine-Preventable Diseases  
12<sup>th</sup> Edition “The Pink Book”

- Currently plan to ship a copy to all Idaho VFC providers by the end of May
- Chapter 5 is entitled “Vaccine Storage and Handling”

---

---

---

---

---

---

---

---

2011 Provider Enrollment Agreement

---

---

---

---

---

---

---

---

• Plan to distribute in May 2011

- Must be signed and returned to the IIP to receive state-supplied vaccine after July 1, 2011
- Changes to brand choice may be requested in June 2011
  - Complete an updated form or,
  - Email changes to [IIP@dhw.idaho.gov](mailto:IIP@dhw.idaho.gov)

## Vaccine Update

Idaho Immunization Program ShotSmarts immunization conference Health Services

---

---

---

---

---

---

---

---

## 2011-2012 Seasonal Influenza

- Survey will be distributed with the 2011 Provider Enrollment Agreement
  - More VFC vaccine will be available than non-VFC vaccine
    - Eligible populations will be a factor in distribution
    - Screening will be imperative
