

EVERYONE PLAYS A ROLE IN SUICIDE PREVENTION: TURNING STRATEGY INTO ACTION

NATIONAL WEBCAST AND LOCAL ECHO EVENT

Suicide is a preventable public health problem. There is strong evidence that a comprehensive public health approach is effective in reducing suicide rates. Learn about the National Strategy for Suicide Prevention and the ultimate goal of eliminating the tragic experience of suicide by registering for the in-person or echo event.

"Everyone Plays a Role in Suicide Prevention: Turning Strategy Into Action" is an interactive event that will include a keynote speaker, knowledgeable plenary presenters, and a panel representing high-risk populations.

The event will kick off "75 Days of Action" to put plans into action and begin to dramatically reduce suicides by National Suicide Awareness Day on September 10, 2013.

Following the national webcast, the Idaho Council on Suicide Prevention will host an "echo event" to discuss Idaho's Suicide Prevention Plan and Idaho specific strategies.

An "echo event" is a community organized gathering convened to engage through the interactive webcast and catalyze local dialog and action. Following the webcast, the host organization will lead discussions on best practices to engage local participants to develop an action plan specific to their work and setting. Echo events will be great opportunities to encourage discussion of community-specific strategies and to develop action plans for a given area.

RSVP BY JUNE 25TH TO KATHIE GARRETT AT
