Topic	Presenter	Discussion	Action/Outcome
Other States	Mary Jo	Other states have a statement of rights document that we could leverage. We should also keep in mind that one form may not work for all populations.	Take recommendations for revisions on Informed Consent Form.
Guardianship	Mary Jo Dana Heidi	Possibly incorporate procedure for a participant to transition even if the guardian is against it into Operational Protocol. There is a legal process for getting the transition to take place even if the guardian disagrees. If a person can demonstrate that they would be successful using HCBS it should be their right under ADA - Olmstead. Do not place the burden on the participant to jump through the legal hoops. Maybe it could be included in the transition management.	
Best Practices	Heidi	Develop training of best practices for guardians of MFP Participants. Usually when you involve the guardian they are more on board.	
Additional Information	Group	The group needs more information before they can have a thorough discussion on how the Informed Consent/Guardianship portion of the program should look.	
Additional Information	Tammy Ray		Tammy will send out minutes, link to TA website, link to H & W MFP Website, Section of OP for Informed Consent and Guardianship, Forms for Informed Consent and guardianship, add Amber Mausling and Heidi Caldwell to work group
