Idaho Healthy Schools Program
Medicaid Grantee School Districts
(As of 8/1/06)

Fifteen (15) Idaho school districts will receive Healthy Schools grants for the 2006-2007 school year. Grants amounts are determined according to the percentage of low-income students and the nurse-to-student ratio in each school district. Grant amounts are percentages of a baseline nurse salary of $40,000 per year. Some grantee districts are supplementing Medicaid grants with district funds.
