TO: Substance Use Disorder (SUD) Provider Network

RE: Medicaid Funded Clients/Residential level of Care

Effective immediately Medicaid funded clients that qualify for a residential level of care will be subject to the current SUD waitlist process due to the fact that Medicaid benefits do not cover residential treatment services. All Medicaid eligible clients are authorized to engage immediately in either Outpatient or Intensive Outpatient treatment services. Those clients that qualify for a residential level of care will be issued a waitlist voucher for residential services. If you have any questions, please contact your BPA Clinical Regional Field Staff representative as listed below.

Sincerely,

BPA Provider Network Management
